PAUL BEFORE FELIX

LESSON TEXT—Acts 24:1-27.  
GOLDEN TEXT—"Herein do I exercise myself to have always a conscience void of offense toward God, and toward men."—Acts 24:16.  
TOPIC—Why Paul Before Felix.

1. Paul Accused (vv. 1-9).  
Paul was now in the hands of Felix who determined to hear his case after his accusers had come from Jerusalem. Among the high priests, and elders came with Tertullus, perhaps a Roman lawyer who formally made the accusation according to Roman law. He began with flattery. He gave Felix the highest praise which he and all the people knew that he had, for Felix was one of the worst governors, destitute of mercy and justice. He brought a fourfold charge against Paul:

1. A "Rebellious Fellow" (v. 5).  
This would indicate a fellow utterly base and corrupt—a platoon.  
2. An Inciter of Rebellion, a Mover of Sedition (v. 6).  
This charge would bring him in connection with the Roman power.

3. That he was the Ring-leader of a Sect, a Subversive Party—a Heretic (v. 7).  
This was designed to throw contempt and suspicion upon the Christians, by the means to bring Paul into deeper trouble.

4. That he had Profaned the Temple (v. 8).  
In this charge we see the wickedness and the craftily suppressed facts.

5. Paul's Defense (vv. 10-21).  
This is a splendid example of the strength and dignity of a man whose life is controlled by a noble purpose, and who has nothing to conceal, and will not distort or suppress facts.

6. Paul's Frankness and Courtesy (vv. 22-27).  
Felix is entirely wanting. He gave recognition of the fact that Felix had been ruler of this people long enough to be able to judge justly, as the habits and ways of the Jews were familiar to him; he then in a dignified manner assumes that Felix will render a just decision based on the facts of the case.

7. The Charge of Sedition Denied (vv. 28-31).  
Paul daily and scornfully denied this charge, showing its utter falsity since the time was too short, it being but twelve days since he went to Jerusalem, and half of that time had been spent as a prisoner of the Romans.

8. The Charge of Heresy (vv. 14-16).  
This he met by a concession and a denial. He admitted that he was of this "way" which they called heresy, but denied that Christians were schismatics. He showed clearly that his actions were in keeping with the Hebrew religion.

(1) He worshipped the same God (v. 14).  
(2) He fully believed in the same Scriptures (v. 14).  
(3) He had the same hope of a coming resurrection of the dead (v. 15).

He declared that he had as the principle of life a conscience void of offense before God and man.

(4) The Charge of Sacrilege or Profanation of the Temple (vv. 17-21).  
This charge he refuted by showing:

(1) That he had come all the way from Greece (v. 17), to worship at the feast.  
(2) That he did not come up empty-handed but had brought gifts for his nation (v. 17).  
(3) That there were not competent witnesses present to testify of his behavior in the temple (v. 19).  
(4) By challenging his enemies to testify as to his conduct in the council (v. 20).

11. Felix Trembles Before Paul (vv. 22-27).  
This is a sort of a sequel to the trial. Wicked as Felix was, Paul's manner somehow won his favor, though he did not release him. His sentence was indulgent imprisonment, while under Roman protection. Felix saw for Paul that he might hear of Christ from him. Paul behaved himself right before these sinners in high life. He reasoned of righteousness, self-control and of judgment to come before Felix and his sinful wife with such power that Felix was terrified, and declared that he would hear Paul further at a convenient time. This was a most timely excuse for not changing his life and granting justice to Paul.

12. Increasing Burdens.  
The man who increases the burdens of his brother will find his own load growing heavier.—Western Christian Advocate.

13. Revenge.  
Revenge is sweet to the taste but bitter in the heart.—Western Christian Advocate.

14. Faith.  
Faith means surrender of the will.—Western Christian Advocate.

The exceedingly slow and over-cautions man may seldom make mistakes or accomplish anything.

Even if machinery did not rust out when exposed to winter weather, it's an eyesore lying around the premises.

High-grade man gives about the same results as limestone in making clover grow, if used in the same quantity to the acre.

Don't go into debt to buy feed for poor cows. Investigators find that one ton of every eight purchased by feeders is unsalable, and is therefore an economic waste.

## FRYEBURG

Mrs. Lena Aldus Strong, Dept. President, G. A. R., Dead—Elmer Harnden Retired From Hotel Business.

Many who had the pleasure of meeting Mrs. Lena Aldus Strong, the Dept. President of the Ladies of the Grand Army of the Republic of Camden, will regret to learn of her sudden death, at her home, last week.

Mrs. Strong was the guest of honor of Grover Circle, and was entertained by Mrs. W. R. Tarbox. Mrs. Strong learned while in Fryeburg, that her mother, over 80 years of age, had broken her arm, and feeling very nervous, had made a very rapid trip home via auto. Mrs. Strong was a very bright, charming woman, and radiated happiness wherever she went. Besides her aged mother and her devoted husband, Leo Strong, Mrs. Strong leaves a large circle of friends to mourn her loss.

Elmer Harnden and wife, who have run the "Argue Not" for the last five years, have taken the rent on Portland street, over Percy Emerson's and are very well satisfied to lead a quiet life for a time, although importuned to re-enter the hotel business again, almost daily.

Mrs. and Mr. Harnden have given excellent satisfaction since they bought the hotel, and everyone was exceedingly sorry to have them retire, as well as the commercial tourists, and a large number of auto tourists, who have entertained every summer. Mr. Harnden had all the rooms in the hotel engaged to regular boarders, for the winter. It is most pleasing to retire with the good will of your patrons from the hotel business, and Mr. and Mrs. Harnden most assuredly are to be congratulated on their success in their first attempt in that line.

Miss Mary L. Gordon, who went to California a few weeks ago, when last heard from, was in the Grand Canyon at the National Park, Arizona.

Several have left for warmer climes, and there are to follow. It is not pleasant to see so many houses closed, but with such high prices, for fuel and hard work to handle, same makes it imperative.

The American Legion gave a ball at the K. P. Hall, Wednesday, Nov. 11, music by Norton's Orchestra.

Wednesday evening, Mrs. Kendall and Mrs. Eli, with Mr. and Mrs. Whitaker, motored to Orlinfield, Ore. Mr. Whitaker being driver, went to inspect the Grange.

The many friends of Mr. and Mrs. Elmer Harnden, recently of the Argue Not, are very glad they are to remain in town.

Mr. and Miss Stell of New York, who have spent the summer at "Ye Inn," returned to New York last week. They have many friends in Fryeburg.

The gymnasium was formally dedicated, Tuesday evening, speeches, music, etc. November has been about as kind to us as any month of the year. Far better weather than October.

Mrs. L. B. Hatch is visiting her daughter, Mrs. Stillings, in Littleton, N. H. Later she will go to Brookline, Mass., to spend the winter with her daughter, Mrs. Charles Hutchins.

4. SWEDEN.  
Shot Wendall Plummer's Dog—Enfield Plummer Sells Steers—C. E. Ring Cutting Timber—Four Gone South.

Game is scarce in this locality, so much so that they have to shoot the neighbors' dogs. Wendall Plummer's little spaniel dog, "Guess" came home a few days ago with two bullet holes in his shoulder. I call that a small part of a man that will shoot at every little dog they see.

If I couldn't find anything else to shoot, I'd go out of business. He is the same one that was shot with bird shot two years ago. I wonder how they would like to have their dogs treated in that way.

Enfield Plummer sold his Hereford steers to E. E. Pingree of Denmark. Ben Knight drove them to Sandy Creek for him last Tuesday. He also sold a cow to A. W. Weston and George Kimball.

Mrs. Wendall Plummer visited her parents, Mr. and Mrs. H. R. Andrews, at Bridgton, last week.

The two youngest daughters of London Merrill, Avis and Bernice, are working in a rubber factory in Hudson, Mass. Edith Merrill is visiting her sister, Mrs. Edith Merrill, of Baldwin.

Loren Robinson of Bridgton has been stopping in Sweden for a few days. C. E. Ring, formerly of this town, now living in Bridgton, is cutting his timber that was blown up in the cyclone of Sept. 12.

Quite an earthquake, Sunday morning, about 10:30. It rattled the windows at the Plummer homestead quite a little. Clarence Partridge and wife of Augusta, also Richard Chadbourne and Gladys, also Richard Chadbourne, started for Florida, Nov. 12, going by auto. They intend to camp the entire trip.

Black Mt.  
Board Saw Started—Roads Muddy and Rough.

Grace and Roger Bryan attended the banquet at Fryeburg Academy, last week. Mr. and Mrs. George Dixon, of Portland, N. H., returned to their home in that place, the latter part of the week. Gus Fowler started up his board saw, last week.

Clayton Tower, wife and daughter, spent the week end in North Conway, N. H. visiting relatives.

Harry Landers spent the week end in Portland, going by automobile.

Roads in this vicinity are very rough and muddy.

I sought the Lord and he heard me, and delivered me from all my fears. This poor man cried, and the Lord heard him, and saved him out of all his troubles. Psalm 34:4, 6.

## This One-Profit Unit-Built Studebaker

offers you 3 major advantages in Quality, Price and Protected Investment

THE average man on the street today knows that through more efficient manufacture, standardization of parts, etc., all makers offer him more for his money than ever before.

All makers claim greater things for their product — and can prove them. All makers rest their case on more economical manufacturing due to quantity production under modern efficiency methods. All cars are fair value but there is a best value.

Few motor car "manufacturers" have foundries, forges, etc., to make their own engines—yet one-fourth of the cost of an automobile is in the engine. Even fewer build their own bodies—yet one-third of the cost of a car is in the body.

Only two makers have adequate facilities for making all bodies, engines, clutches, gear sets, springs, differentials, steering gears, axles, gray iron castings and drop forgings: Ford in the low-price field and Studebaker in the fine-car field.

One-Profit Value  
Because of its unique manufacturing facilities, Studebaker eliminates profits which all other quality car manufacturers must pay to outside parts or body makers. Savings effected in this way run to hundreds of dollars on some models. Thus Studebaker is

able to use finest steels, finest woods, finest engineering and superlative workmanship in its cars; then to add costly extras . . . and still charge no more than competing cars.

## Unit-Built Construction

One-Profit facilities result, too, in Unit-Built construction. In cars designed and built as units. The hundreds of parts used in a Studebaker car are Studebaker. They function together as a unit, resulting in longer life, greater riding comfort and higher resale value for you. Scores of thousands of miles of excess transportation thus are built into Studebaker cars. Records of more than one hundred thousand miles are not uncommon.

## And "No-Yearly-Models"

As a natural outgrowth of those two factors, a third great advantage to the buyer is attained . . . "No-Yearly-Models." Because all phases of manufacture are directly under Studebaker control, Studebaker cars are constantly kept up-to-date. Improvements are continually made—not saved up for spectacular annual announcements which make cars artificially obsolete. Resale values are thus stabilized. As an example of the value One-Profit manufacture makes possible, see the Studebaker Standard Six Sedan.

## Studebaker's Lowest Priced Sedan—but all quality

THE fine Studebaker Standard Six Sedan illustrated below is a real four-door sedan. It is upholstered in genuine wool cloth. Carpets are wool. Windows are real plate glass.

The equipment includes an 8-day clock, gasoline gauge, ash receiver, rear-vision mirror, stop light, dome light, safety lighting control on steering wheel, automatic windshield clear, coincidental lock to steering gear, and ignition controlled by same key operating door and spare-tire locks, and full-size balloon tires. All instruments are grouped under glass on a silver-faced dial set in a beautiful walnut finished panel.

But the most important superiorities of this Sedan are concealed within the framework of the body and in the chassis.

Body pillars, for instance, are of northern white ash, cross-members of hard maple. We pay a premium for steels of extra toughness.

Run the engine—the most powerful in any car of its size and weight, according to the rating of the N. A. C. C. and the Society of Automotive Engineers. The motor is not built for excessive speed, but rather for smooth, trouble-free service at 5 to 55 miles an hour. It is built for a long, quiet life—not for spectacular stunts.

We will gladly demonstrate this car and finance its purchase on Studebaker's fair and liberal Budget Payment Plan.

## THE FRYEBURG FLIVER

To Pay for the Fliver in Advance Will Keep the Patches Off Our Pants

The Fryeburg Fliver is published semi-annually or often, as the case may be, at the Fryeburg Office, Fliver Bldg., Fliver St., Fryeburg.

Its mission is to relieve the strain caused by the shaker, and to raise funds to pay our bills.

Fliver stock is way above par. If you don't believe it, just ask Ma.

We pay liberal commissions to our new agents, some of them making as high as twenty cents per year. One of our agents who started out with nothing, now is seven cents short of having a nickel, and we could make many other instances where our agents have done nearly as well.

Although the Fliver is expressly for you, we generally send your copy along by freight, (as the Fliver sayings have such weight).

Editors—O. R. Mills, Publisher—Carlton Mills, Business Manager—"Clack" Mills, Janitor—C. R. Mills.

Win Day's ten year old daughter sends the following contribution to the editor: "Lew Danforth's using the new red gas, and his old car goes like old locomotives." (Pretty good for a ten year old).

When it comes to repeating, Methinks Win Day will win the day.

Nothing has been heard from Will Bennett since he harvested his beets. Will says he hasn't any kick coming, but he thinks his beets have.

Danforth's sturdy strapping, Dwight, is in a very sorry plight for a while, for he's such a girl as he, oh so many, he's sad because he can't get Annie!

Notice: To those who guffawed so loudly when the Fliver editor was measuring the packing room floor, (with the aid of an extended ruler handle); we would say that the remarks made on that memorable occasion, were ungentlemanly (especially those made by the ladies) and ill-bred, and those making such remarks were lucky to escape chastisement at the hands of the editor.

A Tribute

The Fliver Editor has just returned from that Holiest of Shrines, the hearthstone of his parents' home. That pilgrimage means much to me, and the memory of my mother's smile, will help me through the rough places for many days. Oh such a mother, who regards your grizzled editor as the little lad whom she reared with such tender care through the delicate stages of childhood, and Margaret and Phoebe Allard of Norway were recent callers at Charlie Stearns.

And add; how good to feel the grasp of his calloused palm, the ladage of honor of a life of toil and honest living.

I could ask for no better joy than these dear parents' presence, nor a finer trip.
